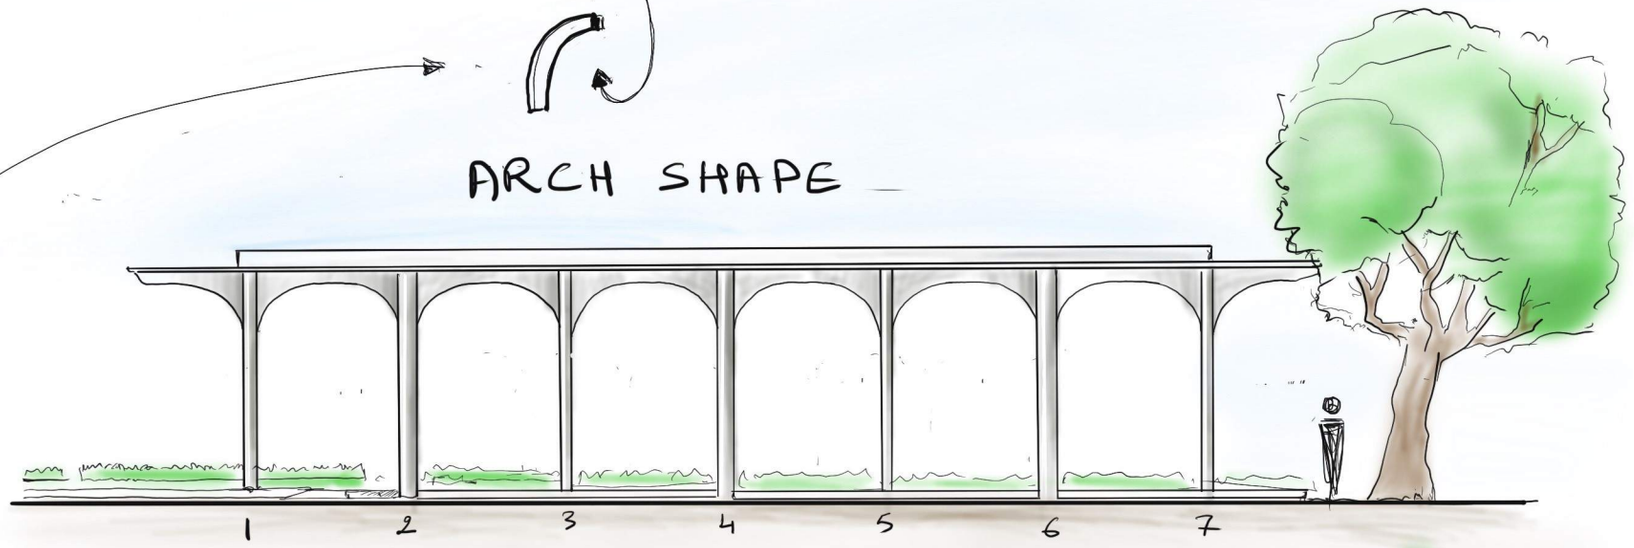
EXISTING CANOPY

NEW DROP OFF CANOPY

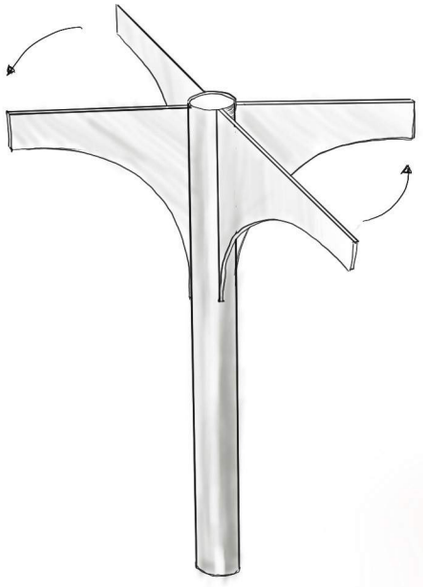
SEVEN CANDLES

JEWISH MENORAH

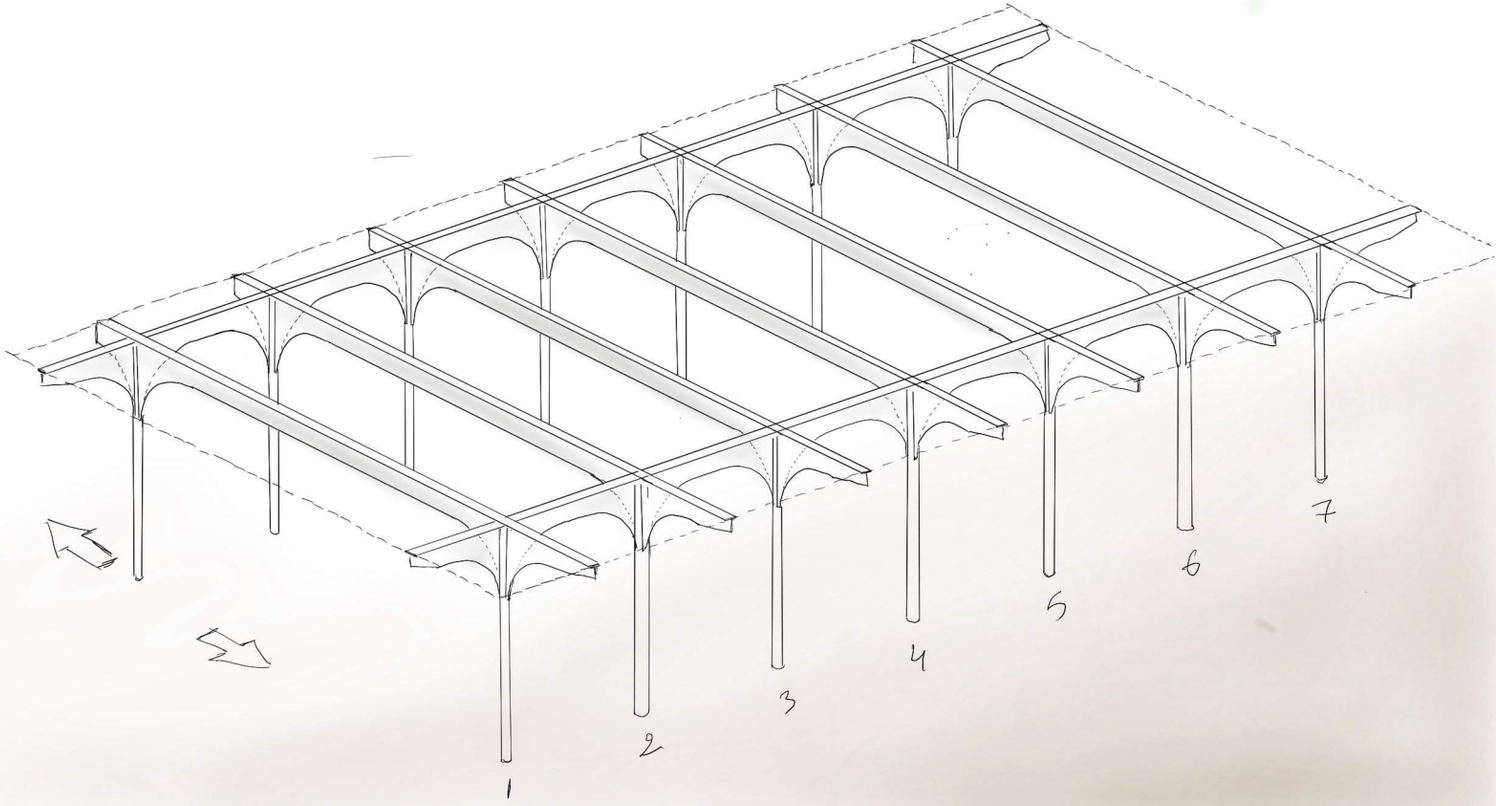
ARCH SHAPE



SEVEN COLUMNS

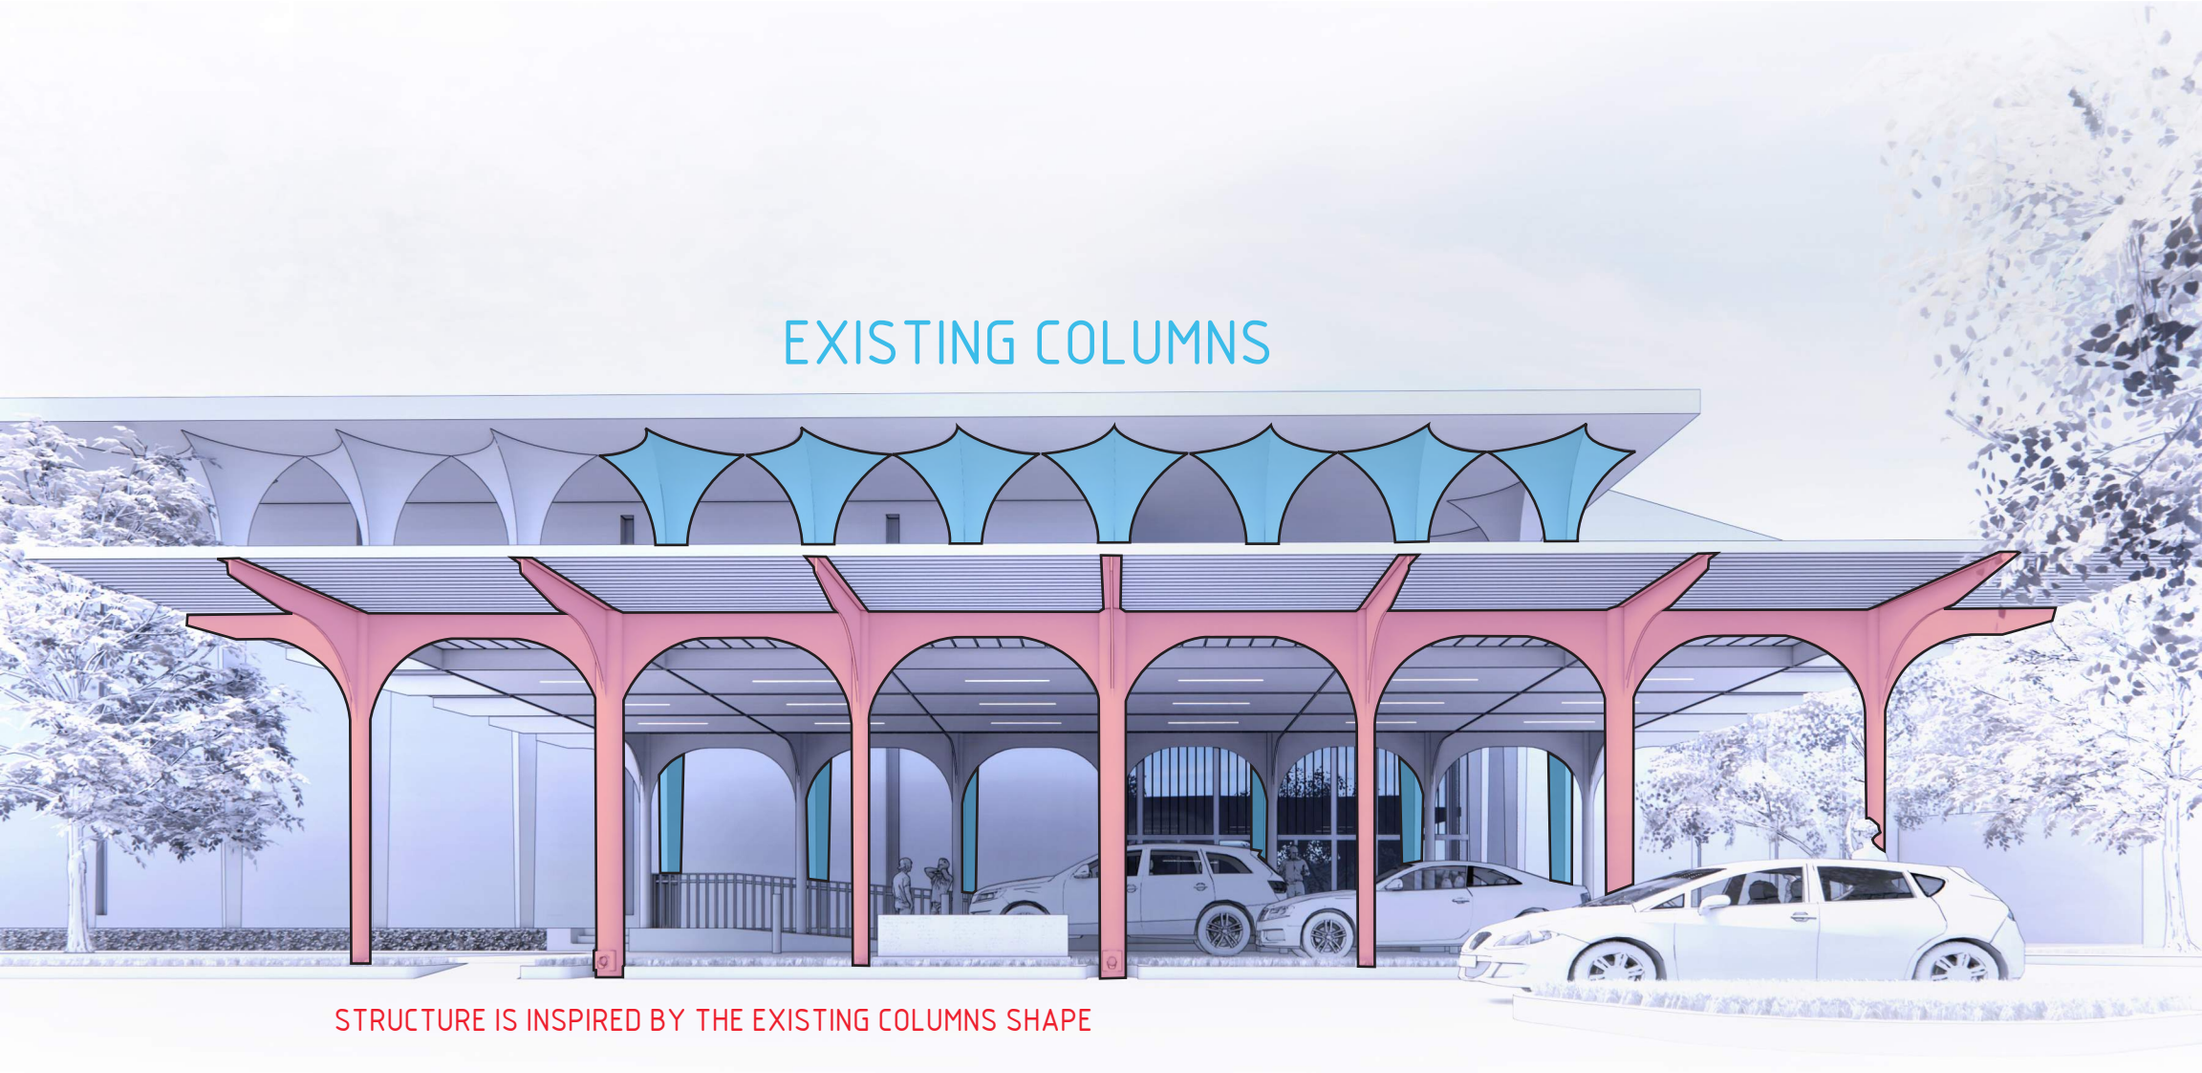


DUPLICATE ARCH

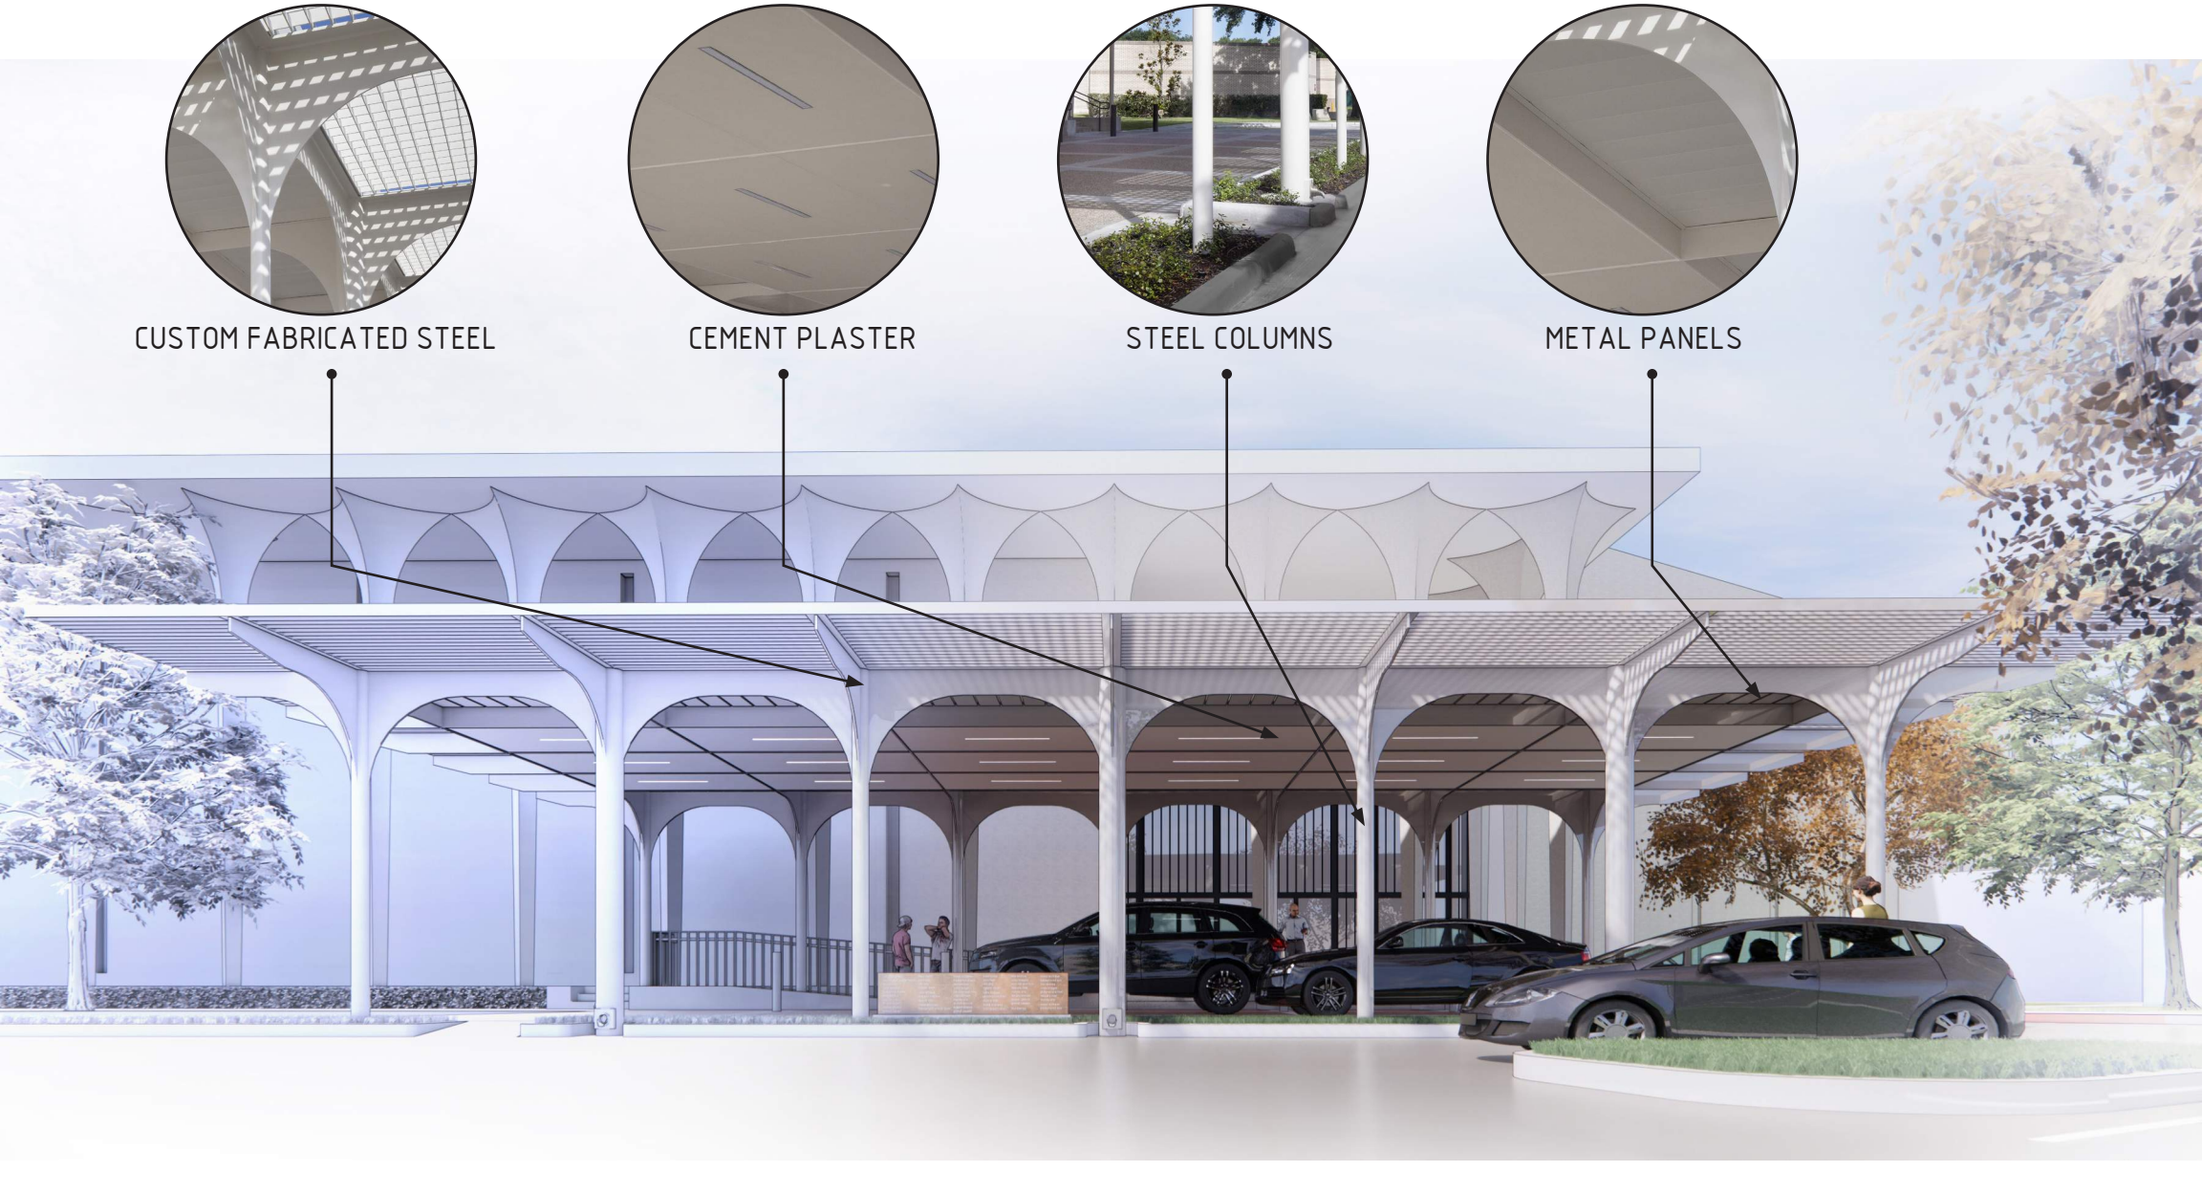


The cantilevered lattice work along the perimeter of the canopy further emphasizes the client's desire of a larger canopy without overpowering the existing architecture.

The new canopy is a modern interpretation of the architectural language used in the existing building. It is significantly larger than existing one, but it looks lighter due to its thin structural profile accomplished by the use of prefabricated steel.



STRUCTURE IS INSPIRED BY THE EXISTING COLUMNS SHAPE



Through the use of similar materials and color palette, the canopy design blends seamlessly with the existing building while providing a new experience to the visitors.

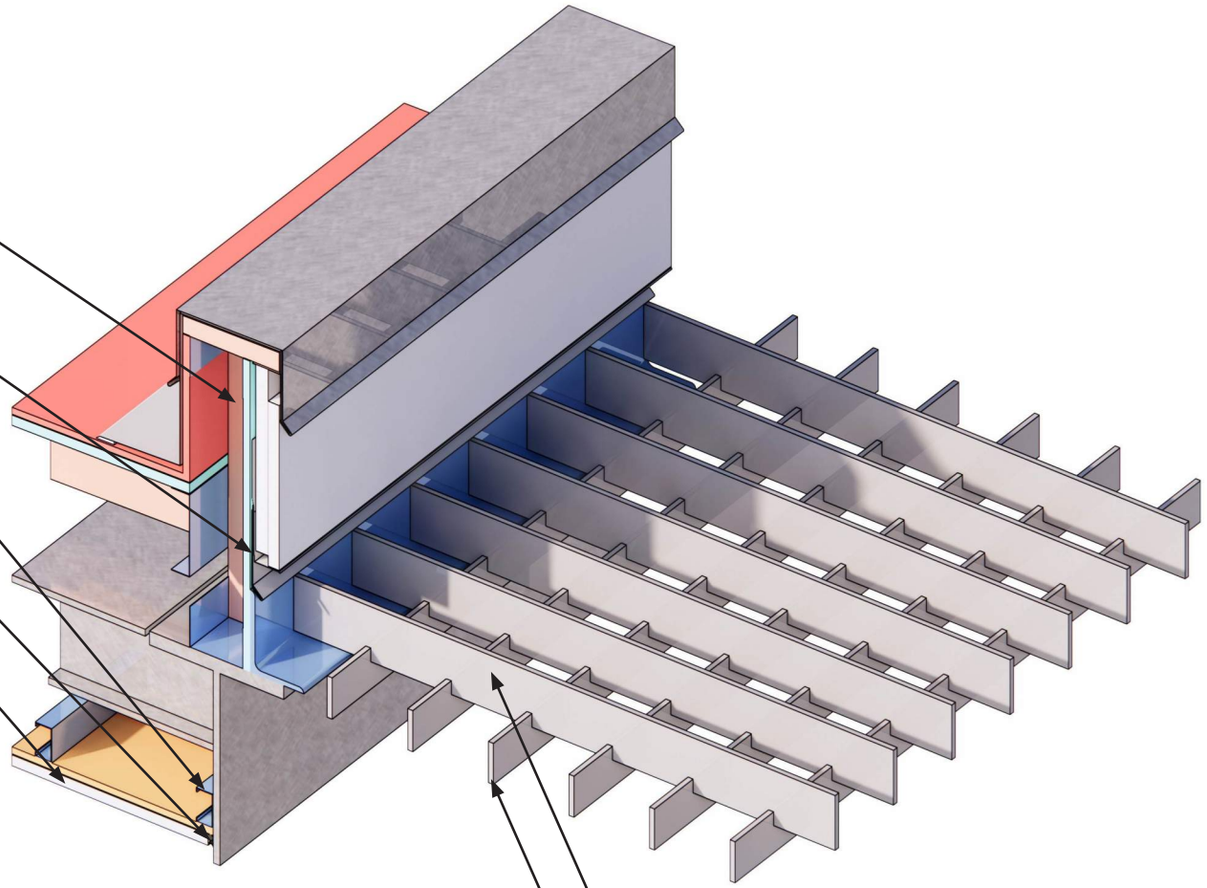
4X4 HSS AT CENTERLILNE OF COLUMN

PREFINISHED ALUMINUM SHEET METAL FLASHING

COLD FORMED METAL FRAMING

JOINT SEALANT

CEMENT PLASTER



4'' DEEP STEEL TRELLIS
